

Affidavit of Andrew J. Wicks

State of South Dakota)

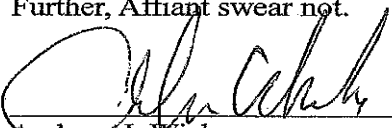

) ss.

County of Codington)

Affiant Andrew J. Wicks of Watertown South Dakota, having been duly sworn and deposed according to law, avers as follows:

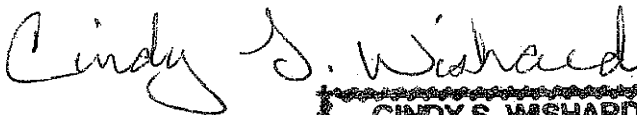

1. I am the owner of Dyno Tune Speed & Performance located @ 1402 26th St. SE Watertown, South Dakota.
2. Dyno Tune Speed & performance has been in business continuously for more than twelve (12) years.
3. As part of my business I own and operate a Dynojet inertia chassis dynamometer for automobiles which is built into the substructure of my building. I chose this type of dynamometer in part because it is known to be very accurate, reliable & consistent in the performance of it's main function, that being providing accurate measurement of the actual torque & power output of automobiles at the drive wheel. I have performed many hundreds of tests on this instrument and it has always been in proper working order and has performed flawlessly.
4. On July 20, 2015 I performed tests on an unmodified 2011 RT HEMI Charger owned by Reggie Huff. Every effort was made to make this automobile perform at it's best to serve as an accurate baseline for comparison purposes. Based on my past experience with similar automobiles the 2011 HEMI Charger was performing properly and produced a baseline consistent with a properly performing HEMI automobile of that type. Dyno Blades provided by Reggie Huff were then installed. Without tuning the fuel or ignition (spark) maps I witnessed an increase in torque below 4000 RPM of between 3.5 – 8% and a peak horsepower increase of between 1.5 – 2 %. I believe this positive change is attributable to the Dyno Blades themselves and no other factor.

Further, Affiant swear not.

Andrew J. Wicks

Sworn before me Andrew J. Wicks on this 3rd day of February 2016.
